

heijmans

Heijmans Business Update

ROADSHOW BOOKLET, FEBRUARY 2022, BASED ON 2021 FULL YEAR RESULTS

About Heijmans

- Founded in 1923, listed at Amsterdam Stock Exchange since 1993;
- Market cap of over € 300 million, share price increase of 60% in 2021 following improved outlook;
- Strong progress after lengthy restructuring in 2008-2018 era, now pure Dutch play;
- Centralised business model with three complementary business segments.

(amounts in million €)	Full year	
	Actual 2021	Actual 2020
Revenues	1.748	1.746
Orderbook	2.061	1.946
Underlying EBITDA	106	85
<i>EBITDA margin</i>	6,1%	4,9%

Heijmans investment case

Robust Balance Sheet
 Solvency of 30%
 Net cash position
 Robust commitment of lenders
 Strong working capital management

Best in class Risk Management
 Independent and seasoned Risk Office
 Well defined risk categories and risk appetite
 Evolved go / no go procedures incl BoD involvement
 Continuous, data driven evaluation of performance

Strong market outlook and demographics
 Fierce housing shortage in the Netherlands
 Energy transition requires significant investments
 Higher sustainability requirements
 Growing urgency road infrastructure maintenance

Improved financial track record
 Successful turnaround after lengthy restructuring
 Last 5 years strong and consistent profit growth
 Much improved predictability of project outcomes
 All business segments now at targeted margins

Established positions in markets
 Key partner of RWS, RVB, Prorail, Schiphol etc
 Growing proportion of recurring revenue
 Integrated design, build and maintain propositions
 Own land bank with good development potential

Streamlined and centralised organisation
 Experienced senior management
 Culture: margin over volume / dare to say no
 Centralised procurement, IT (1 ERP) and HR
 High level of intercompany synergies

Highly skilled teams
 Safety programs prioritised throughout organisation
 Innovative solutions (circularity, smart grids)
 High employee engagement
 Growing portion of data driven services

Key figures 2021

(x € 1 million)

	H2 2021	H2 2020	2021	2020
Revenues	867	907	1.748	1.746
Underlying EBITDA*	71	44	106	85
Result after tax	40	25	50	40
Earnings per share (in €)	1,81	1,14	2,24	1,85
Order book	2.061	1.946	2.061	1.946
Net debt (cash)	-91	-37	-91	-37
Solvency	30%	29%	30%	29%
Number of FTE	4.705	4.678	4.705	4.678

* Underlying EBITDA is the operating result before depreciation, including EBITDA from joint ventures, excluding write down on property assets, restructuring costs, book result on sale of subsidiaries and the contribution of assets to newly founded entities, and costs of soil remediation related to the sale of industrial parks.

heijmans

HEIJMANS ONE

Company profile

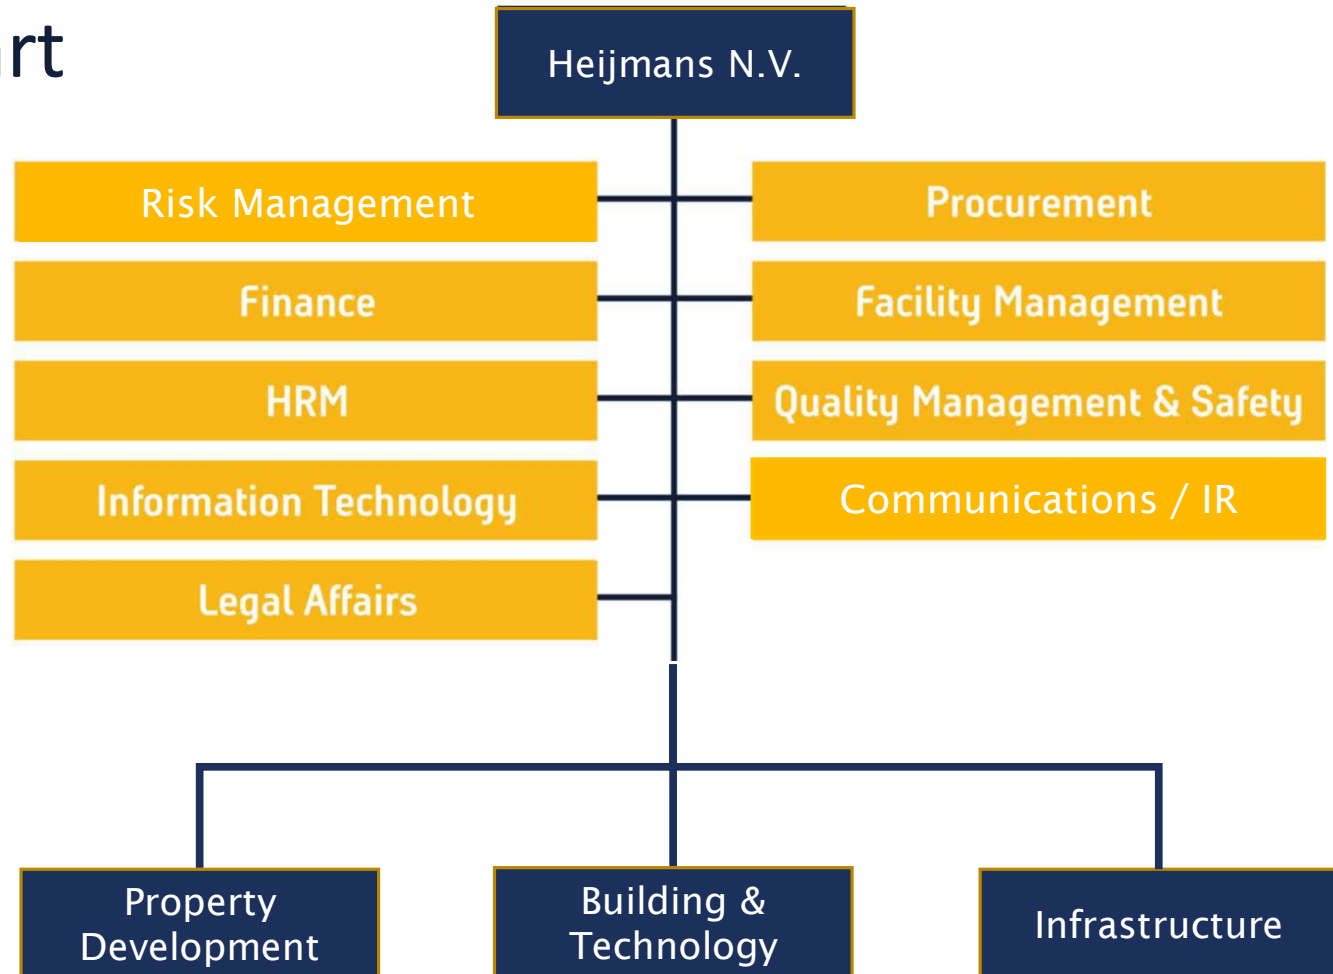

COMPANY PROFILE

History

- 1923 - founded by Jan Heijmans as Infra company
- 1945 and beyond - strong growth following WWII
- 1960's - diversification towards residential building
- 1980's - diversification towards property development
- 1993 - listing on Amsterdam Stock Exchange
- 1993/2007 - strong growth through acquisitions
- 2008/2009 - reset strategy, start of restructuring
- 2013 - strategy building spatial contours of tomorrow
- 2017 - divestment of foreign subsidiaries
- 2019 - strategy better, smarter, sustainable

Organisation chart

Heijmans at a glance

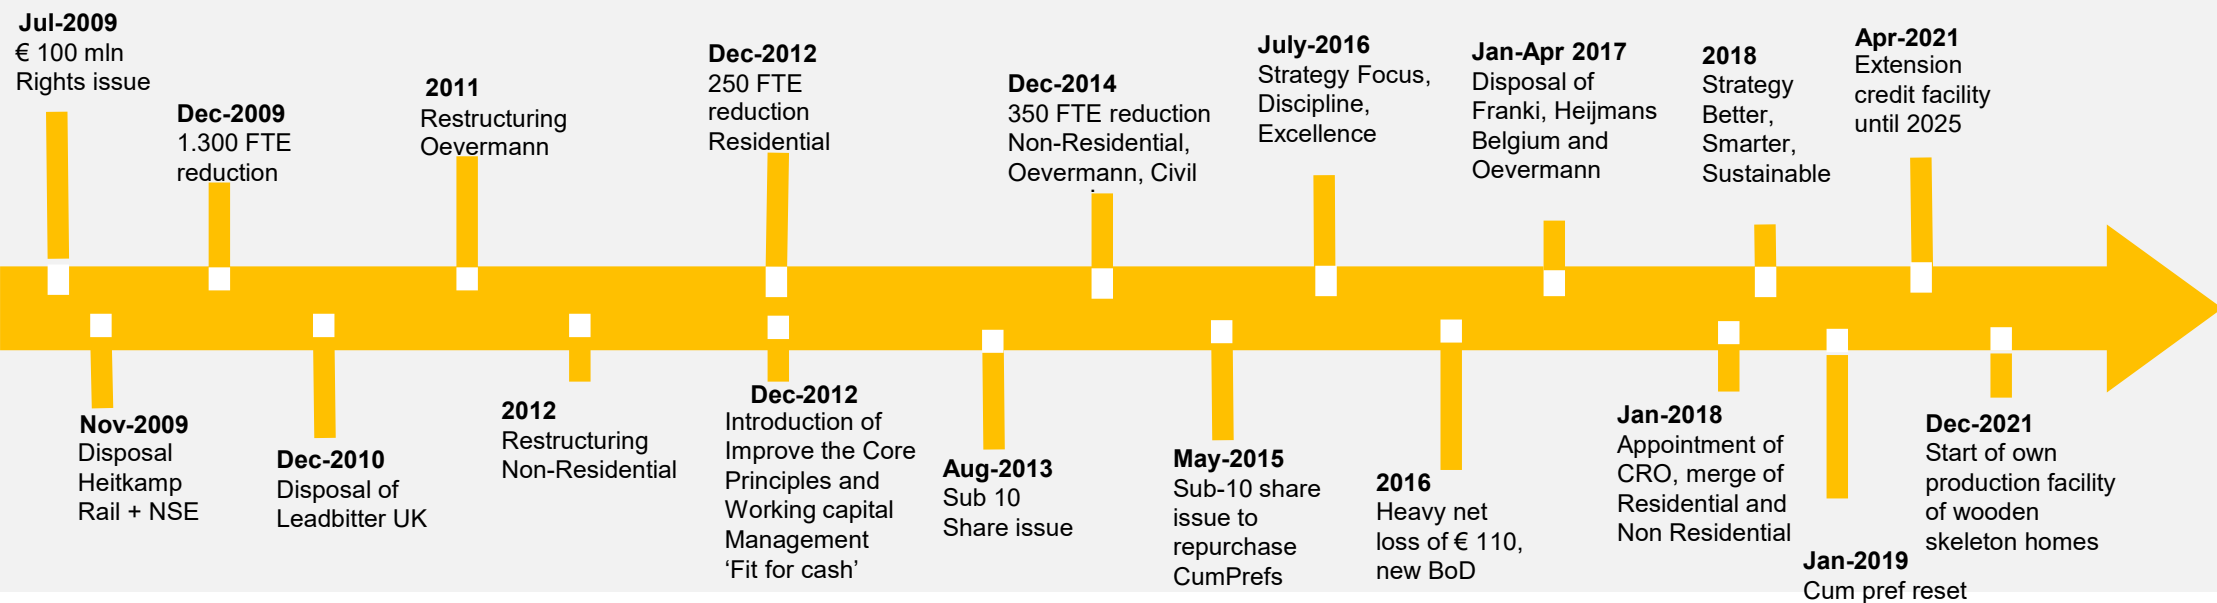

- Building on and bundling initiatives that fit the long-term ambition: creating a healthy living environment, and being aware of our own social responsibility;
- Creating added value by offering the client an integrated approach with focus on quality;
- The activities of Heijmans in the field of Living, Working and Connecting are organised within three business areas: Building & Technology (Residential / Non Residential), Property Development, and Infra.

- Approximately 4,700 employees work on a daily basis for these business segments in the Netherlands. More than 99% of these employees are covered by a collective labour agreement.
- Ambition to achieve a leading position on quality, sustainability and profitability, resulting in:
 - The best choice for clients;
 - Innovation and focus on sustainability;
 - Above-average long-term yield for shareholders;
 - Being attractive and inspiring to employees.

COMPANY PROFILE

Restructuring provides potential

Lengthy restructuring process in the 2009-2018 era:

- Focus on core activities in the Netherlands
- Divestment of all foreign operations
- Reduction of strategic land bank positions
- Improve contract, risk & project mgmt through 'Improve the core' and 'Focus, Discipline, and Excellence' program

Has resulted in healthy and improved profitability since 2017 that offers great potential going forward:

- Streamlined/centralised structure with one ERP platform (SAP)
- All divisions returned to sustained profitability since 2018
- 'Better, Smarter, Sustainable' strategy to focus on future growth opportunities
- Strong balance sheet and commitment of lenders

Competitive strengths

Heijmans' multidisciplinary integrated approach is a major differentiator in the market. Through its centralised business model there is a high level of standardisation of processes and procedures, including BIM, SAP ERP system, and procurement.

Leading industry player in digitalization (digital twin), safety, and sustainability

With an established Risk Office, risk management is prioritised throughout all stages of projects, from acquisition until completion.

Living (Residential and Property Development)

- Development of urban and rural areas in both small and large-scale projects with combination of own land bank positions & tender activity
- Combining creativity and customer focus with strong knowledge of production process and affordability
- Focus on complex renovations and transformations
- Standardisation of concepts (e.g. Huismerk Huismerk)
- Innovative solutions (e.g. Heijmans ONE / Smart Cities / Beyond Eyes) and own (wooden skeleton) production facility since 2022

Working (Non-Residential)

- Combining construction with technical services in integrated projects throughout the entire lifecycle
- Niche position in care, higher education, data centers, governmental sector with focus on long-term relationships including maintenance

Connecting (Infrastructure)

- Top player in Dutch market in focus markets mobility (roads, bridges, tunnels, dykes), energy and urban areas
- Divided in Centralised Projects, Regions, and Specialisms (eg asphalt, cables and wires, asset / traffic management)
- Engineering skills combined with execution power

Greenville – Leidsche Rijn Utrecht

Maanwijk Showcase – Leusden

COMPANY PROFILE

Living: Property Development

Property Development focuses on area development of both large and smaller-scale projects in urban and out-of-town areas. It fulfills the role of both initiator, developer and seller of (mainly) residential properties. It conducts its activities from four different offices under central management. In-depth knowledge of area development is combined with the latest developments towards smart cities and energy generation. Within Property development focus on both new-build contracts and (inner-city) transformation assignments. Own land bank enables us to bring a continuous stream of projects to the market.

COMPANY PROFILE

Living: Residential

Residential Building operates from five regions under central management. Its prime activity is new-build, but it also includes the restoration, redevelopment and renovation of houses. Being both Property Development and Residential Building experts, clients can be offered outstanding conceptual and construction skills. This enables us to realise serial development projects as well as complex city center transformations. Together with our growing maintenance and services activities, this enables us to build on long term client relationships. Roughly 40% is now being built as standardized 'home brand' houses.

Hart van Zuid PPP - Rotterdam

COMPANY PROFILE

Working: Non Residential

Non-Residential designs, creates and maintains high-quality electro-technical and mechanical installations ('Services'), with a growing portion of long term maintenance contracts. It also realises large-scale and complex construction projects in the market segments of health care, high-tech clean industry (such as laboratories), commercial property, (semi-)governmental organisations and data centers ('Projects'). Our unique quality is our integrated approach of design, construct and maintenance capabilities, especially in projects with relatively complex requirements with regard to installation technology.

LAUWERSMEER DYKE ENHANCEMENT

WIND PARK - WIERINGERMEER

COMPANY PROFILE

Connecting: Infrastructure

Infra focuses on the construction, improvement and maintenance of the Dutch infrastructure and public spaces, including related installations and on-site objects. This includes roads, viaducts, tunnels, locks, dykes, water treatment plants and work related to cables, pipelines and energy supply. It also involves technical work to make roads and public spaces safer, such as traffic management, lighting, camera and referral systems. The in-depth and varied engineering skills and execution capabilities enable an integrated approach to infra projects in which design, execution, management and maintenance connect seamlessly.

DRINKING WATER PIPELINE - LOOSBROEK

Strategy

STRATEGY

Strategy until 2023

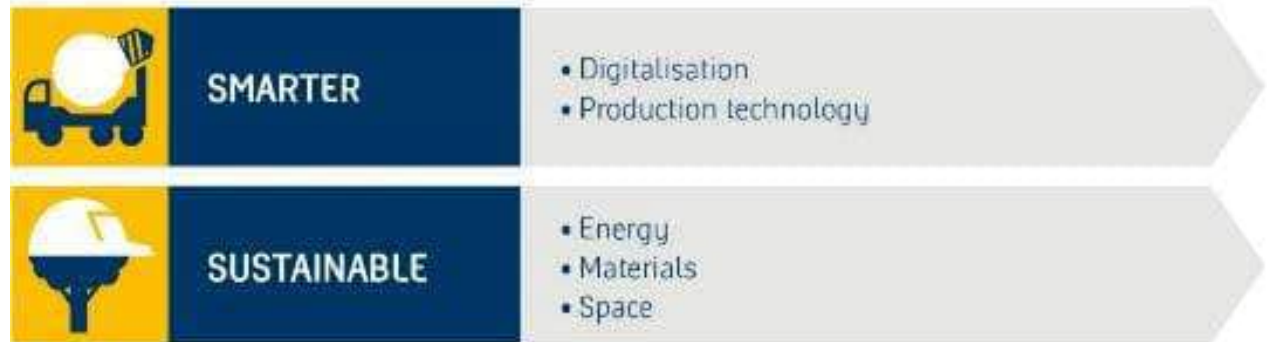

Developments within Heijmans

- To build on 'Focus, discipline, excellence' strategy of 2018-2019 to further enhance risk management, operational kpi's and balance sheet: **"Better"**

Developments outside Heijmans

- Continuous developments within society and construction sector need to be monitored closely. Developments in the field of digitalisation, and innovative production technology require us to make our operations **"Smarter"**. Commitment to making the built environment more **"Sustainable"**

Strategy until 2023: “Better”

Better

Strategic theme	Bold statements	Concrete goals
Safety	We work safely or we do not work at all	We won't be satisfied until we have 0 accidents
		IF rate < 1 in 2023
		In 2023 we have reached stage 4 of the 'safety ladder' in all our business segments
Risk management & Process Improvement	All projects are predictable and contribute to profit	In 2023 we are predictable as all our large projects end within it's initial margin bandwidth
		In 2023 all our projects contribute to profit
Quality of the Organisation	We are the number one employer in our sector	We reduce the number of employees who leave against our wishes by 50% every year
		We reduce sick leave by 5% every year
		In 2021, we have a higher employee engagement score than in previous year

Please see chapter 10 of the Heijmans annual report for the key performance indicators that we have defined for the 8 strategic themes, as well as the scores in 2021 on those kpi's

Safety

STRATEGY - HEIJMANS

Risk management & proces improvement

% projects that contribute to profit (based on #)

94% in 2021 (2023 GOAL = 100%)

Better

- -/- 22% decrease in number of accidents
- No bleeders, well balanced portfolio where all our businesses contribute to the bottom-line.
- Sick leave rate impacted by corona

Quality of the organisation

Strategy until 2023: “Smarter”

Smarter

Strategic theme	Bold statements	Concrete goals
Digitalisation	Digital construction is as important to us as physical construction	Every project we work on has a digital twin in 2023
		We successfully introduce 5 data driven services to the market each year
		The number of memberships from data driven services grows with 50% each year
Production Technology	We will work more frequently on the basis of standardised processes and products	In 2025, we have - compared to 2020 - moved 50% of on-site hours spent to off-site hours spent

Please see chapter 10 of the Heijmans annual report for the key performance indicators that we have defined for the 8 strategic themes, as well as the scores in 2021 on those kpi's

Digitalisation

% project that reaches BIM target-levels

71% in 2021 (2023 GOAL = 100%)

INTRO OF DATA DRIVEN SERVICES

Production Technology

CONCEPT HOMES

STRATEGY - HEIJMANS

Smarter

- Step up in use of Building Information Model (BIM) and introduction of #9 data driven services in 2021
- Further roll-out of concept homes towards apartments - keeping customization / choices for consumer
- Next step in industrialization, by acquiring a factory to mass-produce woodframe houses

Strategy until 2023: “Sustainable”

Sustainable

Strategic theme	Bold statements	Concrete goals
Energy	Our production is CO2-neutral and we create energy-neutral solutions for our clients	As of 2023, Heijmans is CO2 neutral. We offset any residual value
		In 2023, we can produce without emission, in 2030 this is the objective in all our projects
		In 2023, we can deliver energy-neutral solutions for our clients
Materials	We are targeting 100% circular construction in 2023	In all our quotes we calculate the environmental performance . In 2023, those scores will be included as standard in all our quotes we offer to clients
		In 2021, all packaging in our construction projects will be 100% reusable or recyclable
		In 2023, all our houses will be 100% circular. In 2030 this will also apply for apartments
		In 2023, we will use circular asphalt and concrete, in 2030 it will be used in all our projects
Space	We develop blue, green and safe!	In 2021, all our developments are awarded a Greenlabel A rating
		In 2023, all our interventions in the built environment result in an improvement in local biodiversity, climate adaptation and safety
		Each year, we will introduce our newest solutions in three projects that will serve as showcase for a healthy environment

Please see chapter 10 of the Heijmans annual report for the key performance indicators that we have defined for the 8 strategic themes, as well as the scores in 2021 on those kpi's

Energy

STRATEGY - HEIJMANS

Materials

% proportion use of recycled material

Circular/Recycled Asphalt
67% in 2021 (2023 GOAL = 100%)

Circular/Recycled Concrete
75% in 2021 (2023 GOAL = 100%)

Space

projects to which initiatives related to climate adaptation and biodiversity have been applied

19 in 2021

Sustainable

- CO2 emission decreasing due to investments in cleaner equipment (-7%) and disposal of asphalt factories to a non-consolidated joint venture
- Frontrunner in the use of circular asphalt and circular concrete
- We are committed to leave a construction site in a better & healthier state than when we started

RENOVATION BINNENHOF / FIRST
CHAMBER - THE HAGUE

Strategy Property Development

Long term goal
Property
Development:
stable EBITDA-
Margin of 6-8%

- Very strong demographic growth fundamentals hampered by various regulatory issues that impact pipeline, including designation of new development areas by government, changes in environmental and private quality assurance law, sustainability requirements (BENG, Heat Act), and nitrogen issue.
- Result across NL: housing shortage increasing (appr 300,000) and steep price rises in 2019-2023 era, goal to build at least 100,000 houses annually not met unless strong governmental ambition
- Turnover mix:
 - Suburban areas (mainly via land bank) vs inner-city developments (1 on 1 / tenders): 50/50
 - BtC (private individuals) vs BtB (investors / social housing): 60/40, enforcement customer process
- Growth in integrated area development, in which we can differentiate by adding new positions that require state-of-the-art solutions for energy generation and sustainability > towards smart cities
- Early stage involvement of Residential for the execution of projects, with increased focus on standardised home brand labels to increase operational excellence and affordability for clients
- Integrated approach in urban (piled) projects: close cooperation non-residential and civil engineering

MONUMENT 'WESTERLICHT' IN
ALKMAAR AFTER RENOVATION

Strategy Building & Technology

**Long term goal:
stable EBITDA-
Margin of 4-6%**

- Building & Technology includes residential and non-residential activities, with commercial focus based on core competencies:
 - › Services: armed with its installation expertise, B&T is looking to forge more multi-year client relationships (non-residential) through the acquisition of long-term service contracts
 - › Non Residential Projects: focus on specific market segments with high level of knowledge and added value, such as laboratories, healthcare (cure) and data centers
 - › Residential: construction of residential buildings, primarily for Property Development
 - › Multi-functional high rise (piled) construction: combination of residential and non-residential skills to serve high growth for high rise residential buildings in innercities
- Residential: Growing importance of concepts and process standardisation: >50% of production
- As of 2022, start with own production facility of wooden skeleton homes
- Non-Residential: Beyond Eyes as example of smart / efficient maintenance and data driven services
- Growth foreseen in renovation and maintenance, and respond to increased focus on sustainability

HORIZONTAL DIRECTION DRILLING (HDD) - INFRA

Strategy Infra

**Long term goal:
stable EBITDA-
Margin of 4-6%**

- Balanced portfolio of centralised projects, regions / asset management, and specialisms, each roughly 1/3 of turnover.
- Focus markets: Mobility (mainly line infrastructure + wet infra), Energy and Urban areas
- Focus on safety & innovation including digitalisation, energy and reducing ecological footprint
- Strong increase in profitability. Increased commercial and risk management focus is paying off:
 - Change in turnover mix changed to targeted levels, with large projects max. 10% of annual infra revenues, and strong partners based on balanced risk distribution
 - Growing importance of recurring revenue through multi-year (asset management) contracts
 - Increased focus on leadership, predictability, and risk control
 - Profitability rose to targeted levels since 2020, significant increase of predictability project results
 - Strong project results + cost reductions led to strong 2021 figures, but hampered by TenneT case
- Pipeline centralised projects affected by nitrogen issues, but good prospects in other areas

CROSSCOVER

X-ROOF SOLAR PANELS (PARTNERSHIP WITH EXASUN)

BIKESCOUT

TYRE PRESSURE SENSOR TECHNOLOGY IN ROADS

Focus on innovation

Investing in smart technological concepts / sustainable solutions within business segments:

- Creating competitive advantage towards clients;
- Improving future margin potential because of increased added value and focus on marketability;
- Being an attractive and interesting employer where new initiatives can and will be rewarded.

In cooperation with clients focused on marketability

Examples of innovations:

- Heijmans ONE portable house > 200 houses now sold;
- Smart and efficient building management by using sensor technology to generate data on comfort, occupation and usage through Beyond Eyes technology: 10,000+ sensors installed;
- Smart living concept: standardised 'home control' in all family homes;
- Smart city developments in Maanwijk Leusden;
- Hydrofit sewer relining > several projects realised;
- BikeScout and Crosscover: warning system to improve safety of cyclists and pedestrians, several locations;
- Brainjoint: low maintenance expansion joints in overpasses and bridges that can't be heard, felt and seen;
- Energy generating noise barrier ('Solar noise barrier');
- Recoflex Self healing' asphalt concept;
- Smart traffic management system Enschede / Almelo;
- Tyre pressure monitor;
- Light reflecting asphalt / barriers (reduce costs of lighting).

ESG

- Heijmans welcomes the EU Green Deal that has a large impact on the construction sector and corresponds with our ambition to create a healthy living environment. This will result in extensive new business models and initiatives, e.g.:
 - Dyke enforcements to protect against increasing water levels
 - Significant extension of electricity network (cables and wires), and CO2 reduction initiatives in build environment such as solar, windmills, charging etc

- Increased sustainability requirements in residential and non residential buildings
- Nature inclusive area developments to improve biodiversity
- It also results in increased accountability and reporting requirements. Heijmans is currently preparing for the EU taxonomy to be (fully) implemented as of 2023, with 90% of activities qualified as eligible in 2021.
- We have embedded ESG criteria in our strategy “better, smarter, sustainable”. Several kpi’s address the importance of our 1) our impact on the environment, 2) social responsibility and human capital, 2) as well as a solid governance structure. See the next slides for further detail.
- In 2021, we also included sustainability linked criteria in our syndicated loan facility, further underlining our responsibility and accountability in this respect.

EU Taxonomy

- EU Green Deal includes high ambitions to transform and arrive at a more sustainable society
 - > major implications for the construction industry
- EU taxonomy: framework of requirements for companies, investors and auditors to promote accountability and transparency on the sustainability front
- Phased roll-out of six sustainability themes
- Step 1 (2021): classification ('eligibility') of climate mitigation and climate adaptation themes
 - > On the basis of analysis of Heijmans' business activities, 82% qualified as eligible. Of the 18% non-eligible activities, 7% cannot yet be defined on the basis of the current status of the framework
- Step 2 (2022 and beyond): quantification of which share of the eligible activities actually makes a significant contribution ('alignment')

Heijmans and climate change

- Heijmans CO2 footprint: around 28,000 tonnes of CO2 in 2021
- Decline of around 6% versus 2020, which also takes into account:
 - › The disposal of the asphalt plants in late 2020
 - › All scope 1 and 2 activities
 - › Separate ambitions formulated for a number of significant scope 3 activities, such as the CO2 emissions of homes produced and sustainable procurement of materials
- Heijmans has drawn up an Energy Management plan for more concrete measures > focus on vehicle fleet, equipment, building sites and buildings
- **Objective:** CO2-neutral production from 2024. To be achieved by generating energy, cutting energy use and offsetting the remainder
- Heijmans has identified climate change-related opportunities / risks for the organisation

ASSET MANAGEMENT TERNEUZEN LOCK

WILHELMINA LOCK ZAANDAM

BEATRIX LOCK PPP - NIEUWEGEIN

ESG policy Heijmans

Environment

- Digitalisation / Production technology: several initiatives to improve efficiency of materials and impact on environment
- Energy: target to be CO2 neutral in 2030.
- Materials: we aim for 100% circularity in new projects in 2023
- Space: our developments are green, blue and safe

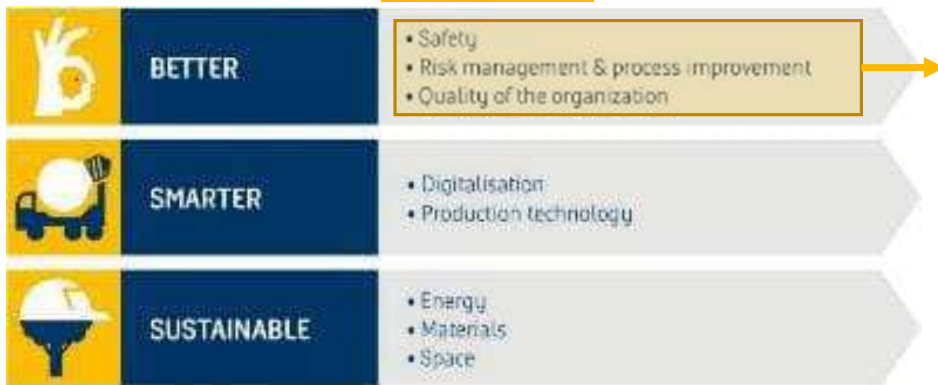

Key measures in previous years:

- Founder of “Matching Materials”, an online market place to re-use construction materials
- First construction company to roll out ‘sustainable packaging policy’ in 2019 to all subcontractor
- Innovation pipeline with focus on green energy generation (a.o. SONOB, light generating asphalt)
- Set up of Heijmans Energy to bundle energy initiatives: ambition towards smart city developer
- Annual reduction targets of CO2 emission a.o. by increased portion of electrically powered equipment
- We develop showcase real estate projects with very high sustainability requirements
- Major step towards CO2 neutral fabrication with start of own production facility for wooden skeleton homes, first 100 homes to be realized in 2022

Social

ESG policy Heijmans

- Safety: With our GO! Programme we aim for IF rate < 1 in 2023
- Process improvement: strong focus on performance measurement and customer satisfaction against clear targets
- Quality of the organization: HR policy to bind, attract & retain employees. Programmes for trainees, and senior mgmt (leadership)

Key measures in previous years:

- Despite strong focus on safety, IF rate still above 3 (FY 2021: 3.8) vs target of 2.0
- Pro-active role in safety: leading role towards schools, clients, subcontractors, and partners
- Continuous improvements in HR incl. rollout of Workday and facilitating working from home (Covid)
- Significant improvement seen in engagement scan of employees. 2021: employee Net Promoter Score (eNPS) of +25 (vs 2019: +7) with response of 83% of all employees
- Several programmes to improve vitality
- Increased focus on diversity in our historically 'male dominated' (2021: 86%) industry. Two recent female appointments in Supervisory Board and one in Management Board to underline ambitions

ESG policy Heijmans

- Risk management & Process improvement
 - > Full implementation of Corporate Governance Code, Compliance Office and Integrity commission
 - > Strong lines of defense, including Internal Audit and Risk Office
- Quality of the organization: Transparent interaction with stakeholders (incl Works Council and shareholders)

Key measures in previous years:

- Introduction of independent Risk Office and GRC model to challenge project teams and support Executive Board decision making during all stages of projects, from tender until completion
- In addition to two-headed Executive Board, introduction of Management Board including Corporate Risk Officer, Corporate HR Officer, Procurement director and managing directors of 3 divisions
- Programs to improve corporate culture: leadership & ownership, open & transparent
- Low level of integrity issues, with clear measures in respective cases
- Remuneration policy: Corporate Governance Code balanced with aim to award and retain talent

LIGHT ART THE SWARM IN EINDHOVEN (WON THE NATIONAL STEEL AWARD 2020)

Dutch Construction Market

Nitrogen issue explained

- NL: 166 designated 'natura 2000' areas: nature areas protected by European law
- 118 with habitats sensible to nitrogen emissions
- Until May 2019, the "Program Approach Nitrogen" (PAS) allowed to include positive effects of future developments while calculating the net 'nitrogen impact' for obtaining permits under the Nature Conservation Act.
- This approach was dismissed by the Dutch Council of State in May 2019, and since then issuance of permits has come to a standstill.
- Restrictive conditions apply under new policy
- New Dutch cabinet (since January 2022) has ambitious plans with regard to construction of new homes and infrastructure, but a lot of uncertainties and unclarities remain, which sets new legislation and measures on hold.

Nitrogen: impact Heijmans

- Heijmans: Technical solutions / innovations are being explored
- Government: several upcoming measures need to be reconsidered with additional focus on 'compensation measures' in requirements
- Until now, no Heijmans projects in execution are cancelled / suspended
- However, pipeline of projects is heavily impacted, difference between 'tender market' and projects outside the tender process, e.g. with own land bank
- Impact on tender volume is mainly seen in Infrastructure, as contracting authorities need to consider whether / under which conditions their projects are permissible
- Projects outside the tender process are less affected: Heijmans has more options to propose compensating measures itself where necessary. However, this can impact costs and timing
- In all cases, clear governmental solutions on a short notice are still required

PFAS issue explained

- PFAS is a family name for 6.000 material, including Pfos, Pfoa and GenX and is being used for decades in all kind of applications
- PFAS is strong, mobile (especially in water) and hardly degradable
- Hundreds of locations known in the Netherlands, with PFAS concentrations
- Limits apply that should be considered when re-using soil.
- Government has temporarily increased limits, permanent regulation expected soon
- Generally speaking, current limits are workable for Heijmans, main constraints in projects with impact on groundwater

WINTRACK II - TENNET
INFRA

Tennet arbitration

- Project awarded in February 2017 with original contract value of appr. € 250 mln
- Two contracts for the design and construction of innovative, hybrid (steel/concrete) pylons on two new high-voltage transmission lines, Eemshaven-Vierverlaten and Borssele- Rilland, to be carried out by a consortium made up of Heijmans (60%) and Eurocoles (40%).
- Both contracts terminated by Tennet in September 2018 when progress was 10-15% of contract sum. In May 2021, arbitrators ruled that this out-of-court dissolution was lawful.
- Following this negative and disappointing verdict, we provisioned € 34 mln from a precautionary point of view. The combination does not agree with the ruling and is preparing to appeal.
- The appeal might lead to the decision not being upheld
- Final damages will be defined by the arbitrators following a subsequent damages procedure. Still significant bandwidth
- To avoid interfering in the highly complex proceedings, Heijmans will make no further statements pending the arbitration, and there was no news in H2 2021

Shortage indicator (houses for sale / # transactions)

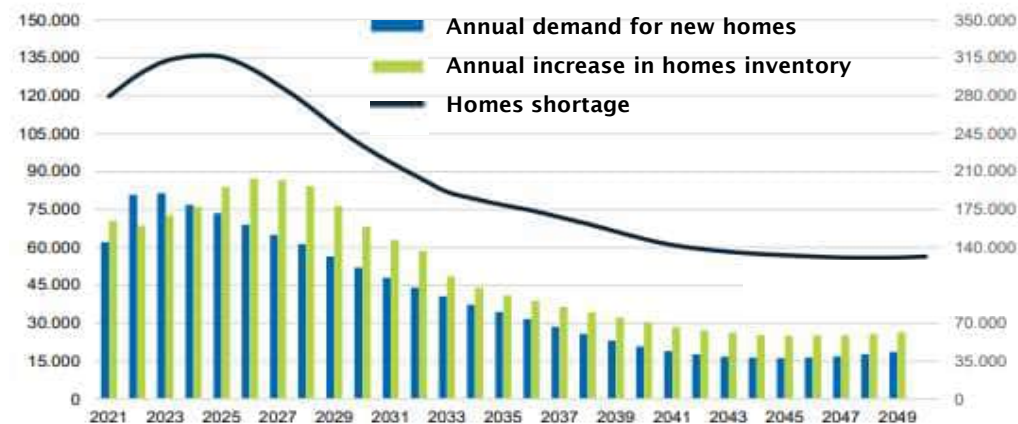

Average sales price houses (in absolute amounts and annual growth rate)

Source: NVM annual update Q4 2021 (January 2022)

Expected annual growth in demand for homes and homes inventory, as well as homes shortage (2021-2050). Source: Primos (2021)

Supply of houses for sale has decreased sharply since 2014 and production of new build houses unable to meet strong demand ...

...as a result, house prices have increased rapidly. First in the Big 4 cities, but recently the growth rate was even higher in suburbs. NVM reported record house price increases of 20% annually in 2021.

Shortage is expected to increase until at least 2025, as current plan capacity is too low across the country.

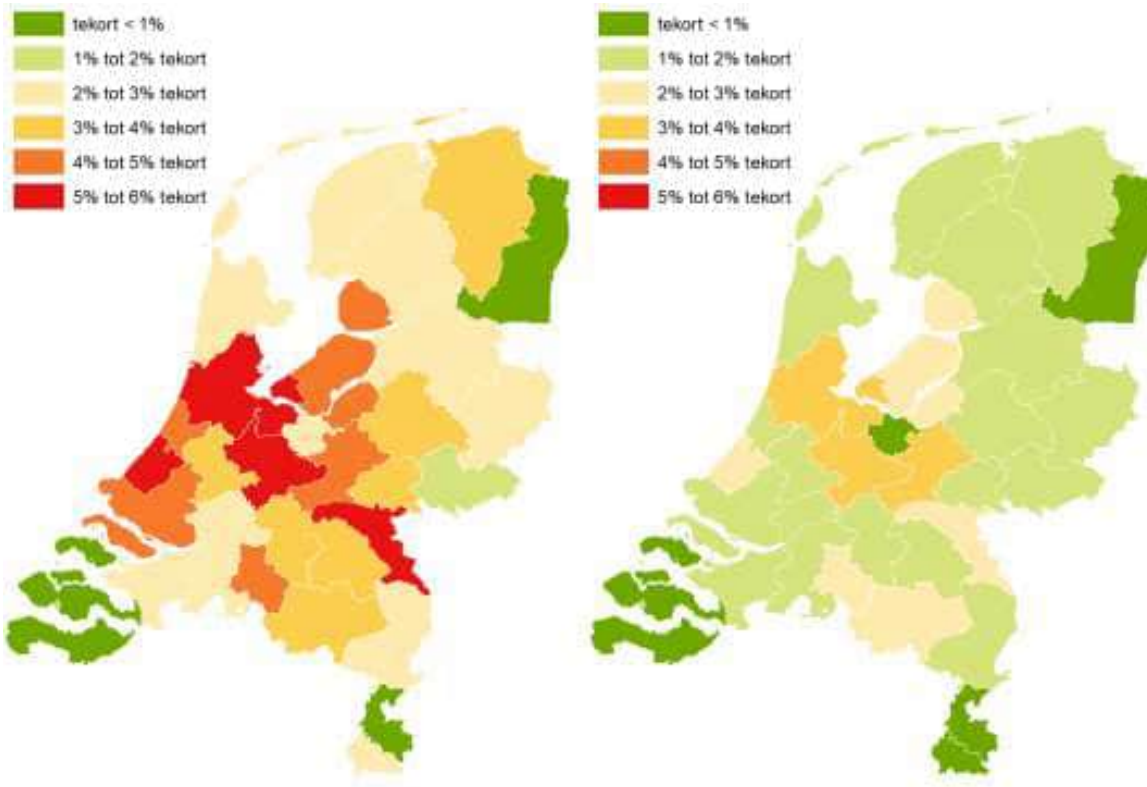

Dutch market

EIB (Dutch Institute Construction Sector) and Rabobank describe the following opportunities and trends:

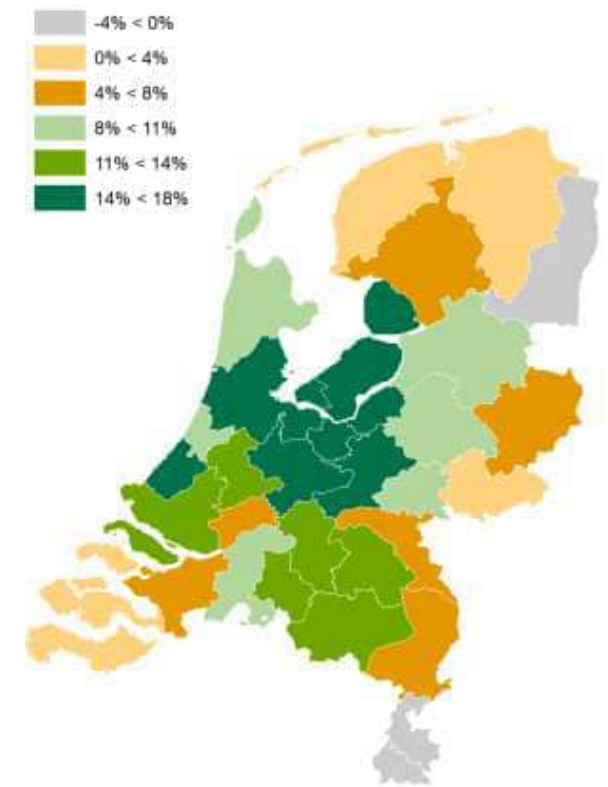

- Pre Covid 19, the € 70 bln market grew with 4% in 2019, and the outlook for 2020 and 2021 was flat with growth envisaged in the maintenance and renovation segment and a decline envisaged in the new build market due to PFAS, nitrogen and new legislation related issues that lead to temporary delays in permits / start of tenders.
- Following Covid 19, Rabobank (December 2021) saw a 0.8% decrease in 2020, followed by an expected +2% in both 2021 and 2022.
- EIB (January 2022) reported a 2% increase of the sector in '21 and expects a 5% and 4% increase in 2022 and 2023, resulting in stronger pressure on labor market.
- Considerable differences across subsectors remain (EIB), with renovation subsector showing strong growth as spending patterns shift from leisure to 'own house'
- New build sectors were relatively hard hit in 2020 due to all regulatory issues that led to delays in permits: residential -/- 10% and non residential -/- 5%. New homes will increase with 10% and 7% in next years, but insufficient to meet 100,000 annually
- Despite Nitrogen, Covid and PFAS issues, infra volume was flat in 2020 and 2021, and several uncertainties remain
- Demographic outlook (increasing housing shortage combined with stronger than anticipated population growth due to migration) remains strong
- Longer term outlook after 2023 remains strong (+2% annually).
- Innovation (industrialization, digitalization, sustainability, energy transition, smart technologies) offer potential to grow and drive up margins

Dutch housing market

Housing shortage in 2021 and 2034 across the country

Growth in households across the country (2021-2034)

Source: Primos (2021)

Dutch housing market

Fundamentals have improved considerably since 2014 after 7 years of declining market:

- Historically low interest rates, increased consumer confidence and government policies (limiting tax deductibility and revised social housing policy) have resulted in an increased housing shortage: at least 800,000 new build houses to be realised before 2030 to fill current shortage of 300,000 homes and respond to further demographic growth and higher level of 1-person households;
- Traditionally high % of social housing is shifting towards bigger private sector (private rental and purchase property). Specific growth areas: Innercity development / transformation (mainly Randstad), affordable homes for starters and single person households. Main cities only able to fill in appr. half of the additional capacity and showing very strong price rises, therewith also growth expected outside cities where prices are lower.
- Targeted level (government) of at least 75,000 new houses per year was not met in 2014-2019 era. Target now even upped to 100,000 per year, as housing shortage is still around 300,000. Following reasons for lack of supply unless strong demand:
 - › Government: delays in permit procedures, higher building aesthetics requirements, higher limits for nitrogen and PFAS, obligation to build without gas and new private quality assurance law
 - › Construction companies: cost price inflation due to increased demand for people and materials.
- Due to increased procurement prices and stronger regulatory requirements including sustainability requirements, cost prices of new built homes are increasing rapidly

GZG DEVELOPMENT - 'S HERTOGENBOSCH

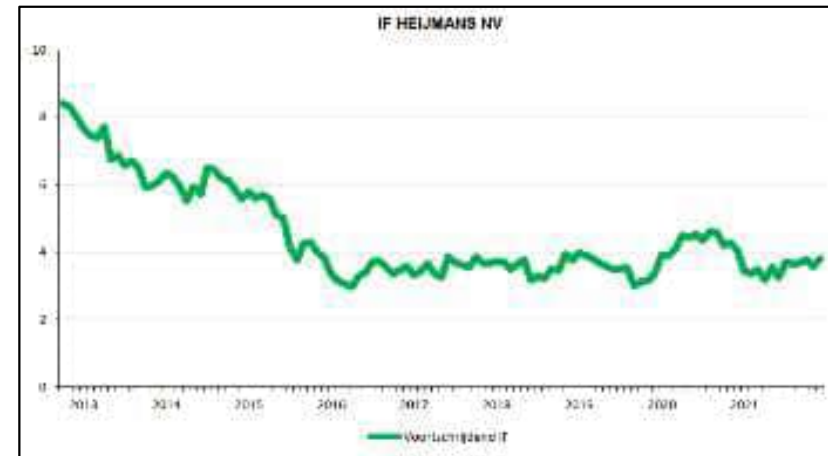

“Heijmans annual results: 2021 excellent year, solid basis for 2022”

Ton Hillen, CEO Heijmans N.V.
Gavin van Boekel, CFO Heijmans N.V.
February 18, 2022

Safety

Trend number of accidents (incl. subcontractors and temporary employees)

Trend IF figure (own employees, incl. insourced workers)

One concept,
Various applications

HEIJMANS HOMEBRAND HOUSES - RESIDENTIAL
FULLY STANDARDISED PROCESS

Highlights 2021

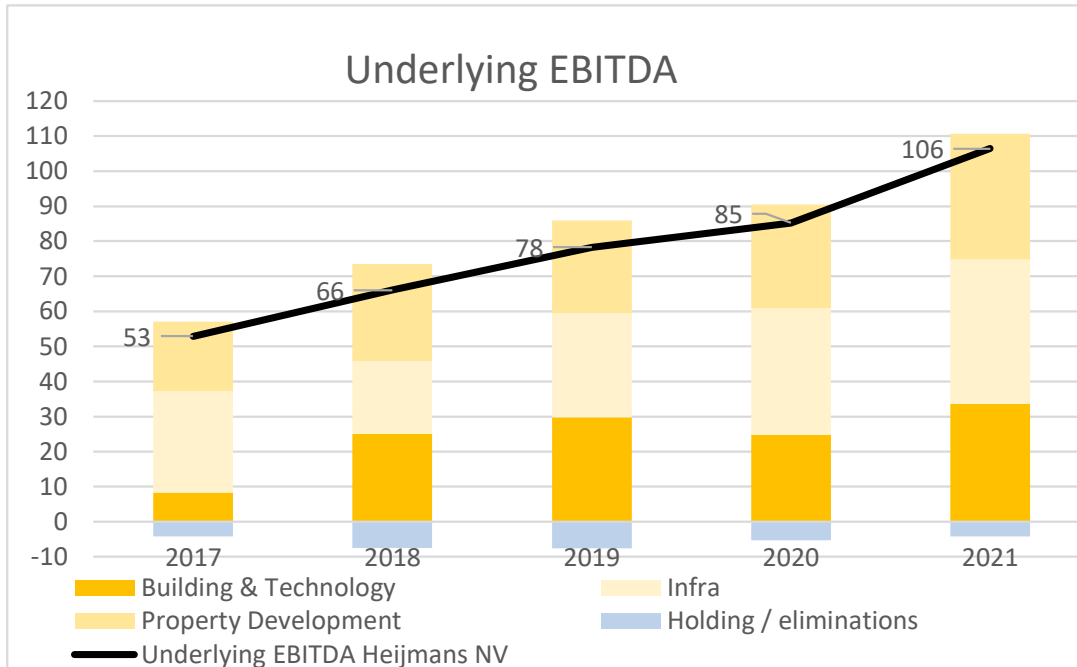

- 2021 an excellent year, solid basis for 2022
- Underlying EBITDA up to € 106 million on comparable revenue (margin 6.1%)
- Net result rises to € 50 million in 2021, 25% higher than in 2020
- Order book remains at a good level at € 2.1 billion
- Balance sheet improves again: higher solvency (30.1%), robust cash position
- Dividend proposal of € 0.88 per share (pay-out ratio 40%)

SCHIPHOL MAIN CONTRACTOR
CONTRACT WAS EXTENDED IN 2021

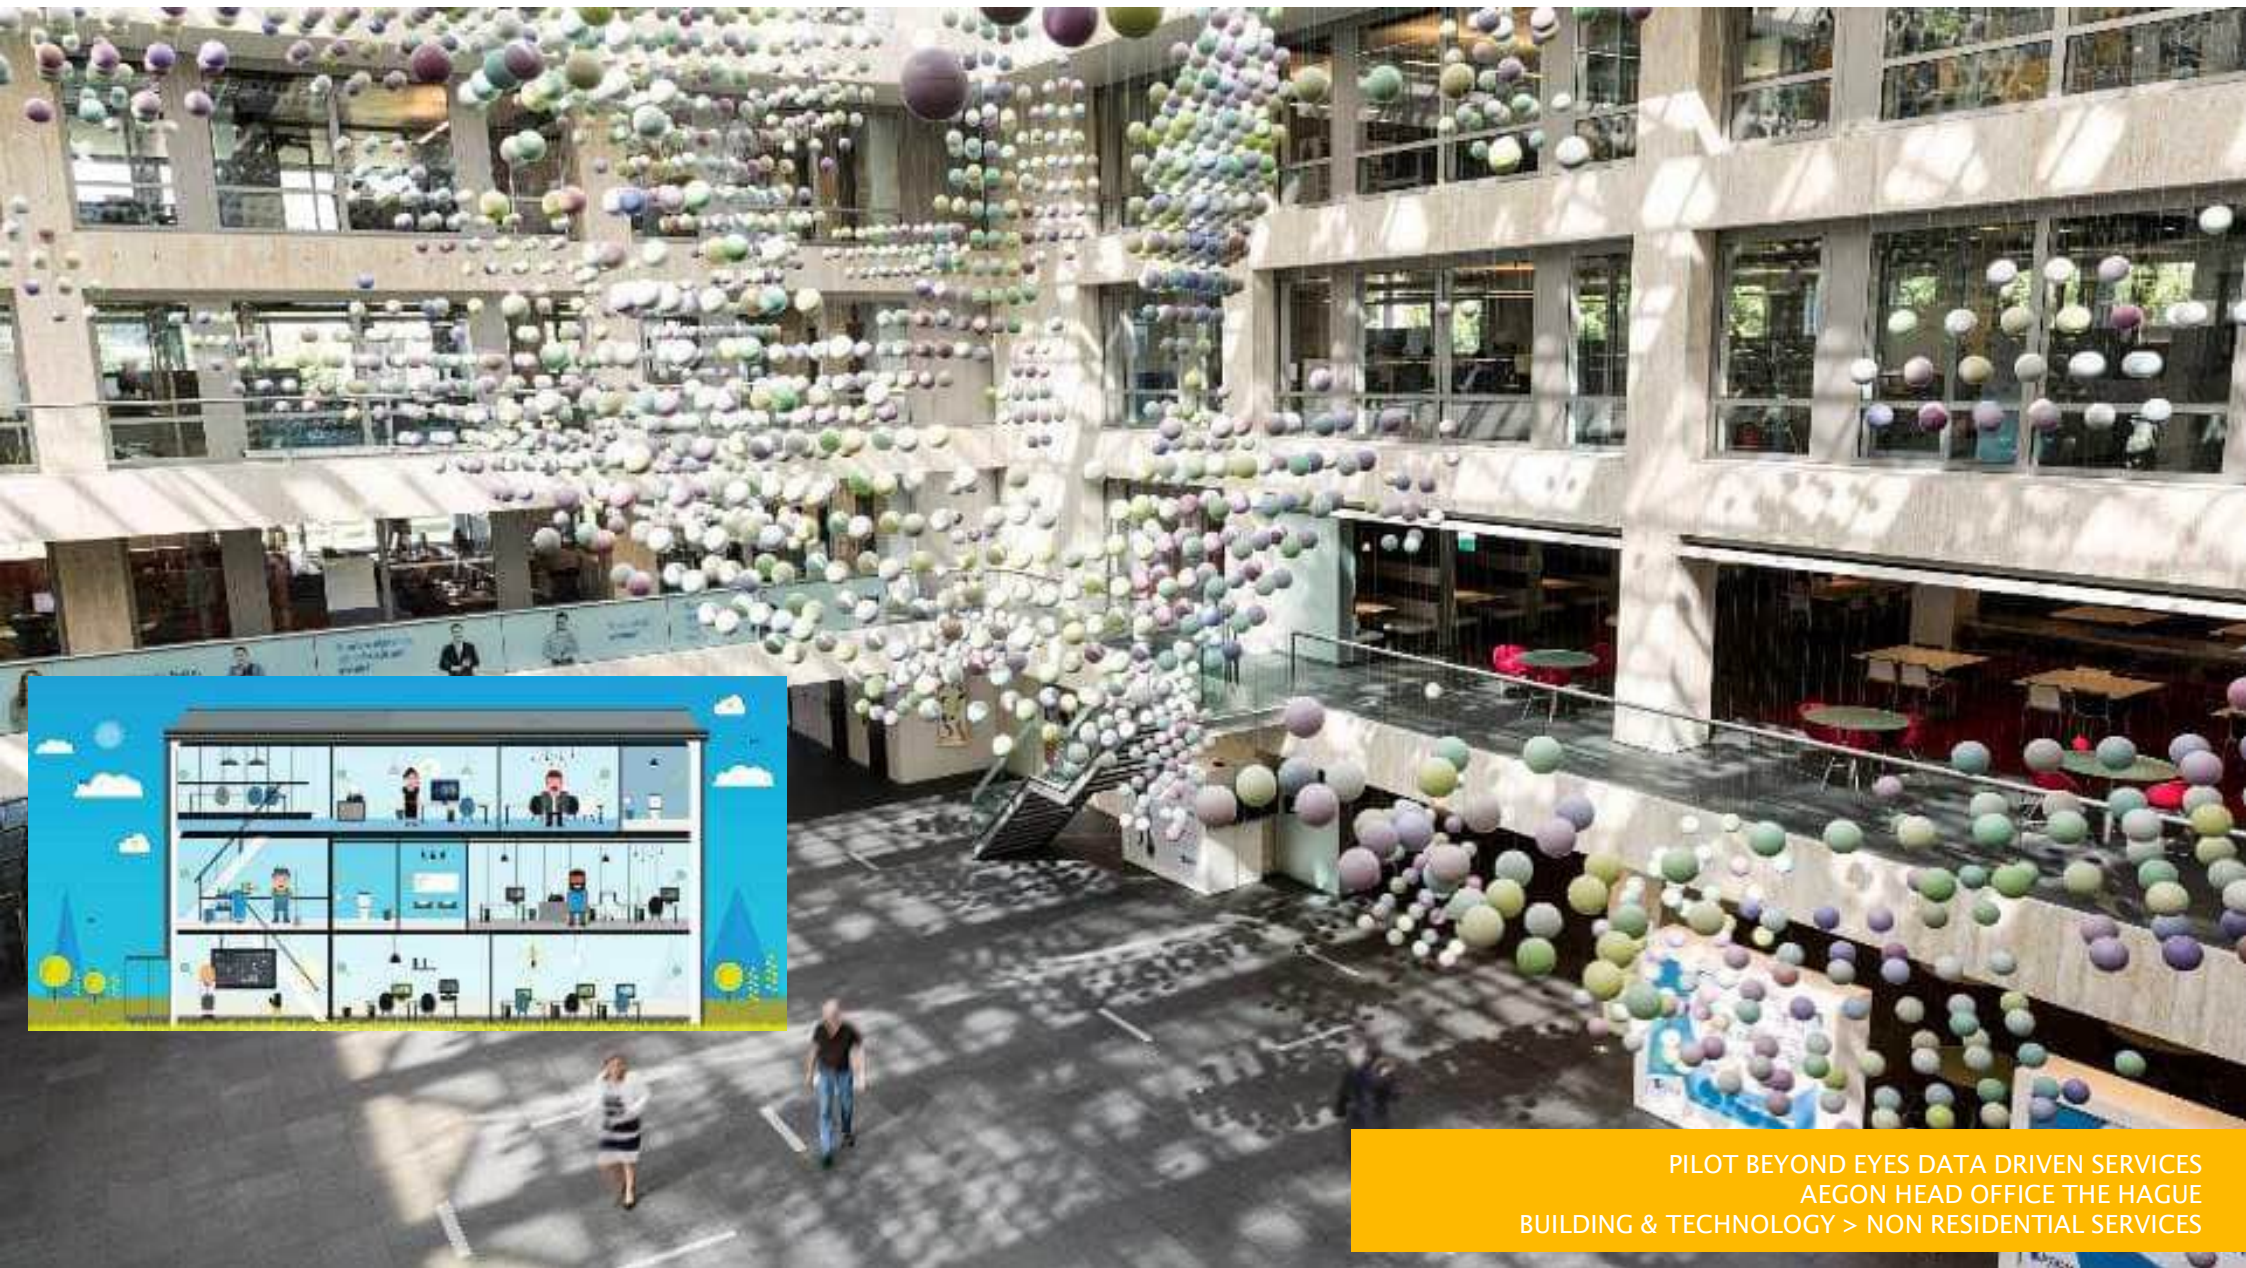

Progress last 5 years

Steady revenue growth with focus on margin improvement.....resulted in doubled underlying EBITDA, with all sectors performing within bandwidth of targeted margins in 2021

Note:

- 2017 revenue excluding € 87 mln from foreign activities that were sold in April 2017
- 2017 en 2018 reported EBITDA increased retrospectively with IFRS 16 impact on depreciation that was recorded in 2019

PILOT BEYOND EYES DATA DRIVEN SERVICES
AEGON HEAD OFFICE THE HAGUE
BUILDING & TECHNOLOGY > NON RESIDENTIAL SERVICES

Property development: rising revenue, good results

<i>(x € 1 million)</i>	H2 2021	H2 2020	2021	2020
Revenues	260	258	548	482
Underlying EBITDA	17	16	36	30
<i>Underlying EBITDA margin</i>	6,5%	6,2%	6,6%	6,2%
Order book	595	540	595	540

- Underlying EBITDA up by 20% compared with 2020
- Rising sales prices pushed margins up, despite increasing procurement costs
- 18% more homes sold
- Continued tension between supply and demand
- Lack of planning capacity, slow issuance of permits and frequently prolonged spatial planning procedures remain a challenge in this market

Building & Technology: highest profit growth

<i>(x € 1 million)</i>	H2 2021	H2 2020	2021	2020
Revenues	406	450	789	920
Underlying EBITDA	18	11	34	25
<i>Underlying EBITDA margin</i>	4,4%	2,4%	4,3%	2,7%
Order book	1.224	1.101	1.224	1.101

- Revenue declines by 14%, mainly due to temporarily lower volume in non-residential projects
- Underlying EBITDA up by 36%, margin increases from 2.7% to 4.3%
- Main Contractor contract at Schiphol extended, new contract signed with ASML
- Services (non-residential) remains at stable level despite Covid-19
- Residential building: major undertaking regarding renovation and sustainability (1,167 homes)

Infra: looks back at an excellent year

<i>(x € 1 million)</i>	H2 2021	H2 2020	2021	2020
Revenues	363	352	738	662
Underlying EBITDA	38	20	41	37
<i>Underlying EBITDA margin</i>	10,5%	5,7%	5,6%	5,6%
Order book	712	731	712	731

- Revenue rises by 11.5%
- Excellent project results combined with no loss-making projects
- Balanced portfolio with higher level of recurring business: smaller regional projects
- Revenue from specialisms at healthy level, despite further decline of major projects
- Underlying EBITDA margin at 5.6%
- Variety of sustainability investments, including those in transport

Taxes

- The effective tax rate was 8.5% in 2021 (2020: +/- 0.3%), significantly lower than the nominal tax rate, due to the recognition of previously unrecognised losses
- New legislation related to tax loss settlement from 2022:
 - › If pre-tax profit > € 1 mln: tax must be paid on 50% of excess amount.
 - › Consequences: cash out from 2022 + lower loss carry-forwards within horizon in which deferred tax assets are determined
 - › Unlimited period to offset tax loss carry-forwards
- The upward revaluation of the tax asset as a result of higher business forecasts was higher than the non-cash tax charge described above
- Year-end 2021: € 118 million in tax loss carry-forwards, with € 19 million of these unrecognised
- Tax assets from recognised losses: € 25.5 million on the basis of nominal rate of 25.8% applicable in 2022

Cash flow and financing

- Net cash position improves to € 91 million, on balance an improvement of € 54 million
- Working capital remains at a healthy level due to continued strong pre-financing conditions and fast receivables collection
- Solvency improves again to 30.1% (2020: 28.8%). Balance sheet at robust level
- Dividend proposal: € 0.88 per share, in line with pay-out ratio of 40%, optional dividend
- Number of cum. pref. shares B will almost halve on the basis of performance agreements
- Syndicated loan facility extended in H1: € 117.5 million committed to year-end 2025. Heijmans made no use of this facility in 2021

RAIL UNDERPASS AT CONTACTWEG IN
AMSTERDAM: 75% RECYCLED CONCRETE

Outlook 2022

- Slight increase in revenue with comparable underlying EBITDA
- Well distributed order book at € 2.1 billion
- Heijmans well positioned in growth markets
- Government plans will have to be translated into concrete measures
- Full of confidence towards centenary in the spring of 2023

KONINGSTUNNEL - THE HAGUE

Financing, Cash flow, Financial statements

Financing in place

The most significant financing arrangements include:

- € 117.5 mln syndicated loan facility (see right column)
 - € 31 mln in cumulative preference shares, € 15 mln to be repaid in H1 2022, after which the coupon will lower with 1% to 7.21%. Perpetual tenor, subject to a conditional repayment scheme. Next dividend reset at start of 2024
 - Appr. € 240 mln in guarantee facilities, of which roughly 50% is used
 - In addition, several project financings in place in PPP and Property Development, both recourse and non recourse, as well as several leases
- Main characteristics Syndicated Loan Facility:
- Facility with ABN Amro, ING and Rabobank, most recently amended and extended in April 2021
 - Total committed amount of € 117.5 mln, with € 20 mln of this in the form of an overdraft facility
 - Tenor extended until 31 December 2025, with option to extend with 1 year
 - New financial covenants, including better alignment with reported results
 - Limited release of securities, remaining security includes bank accounts, accounts payables and several land bank positions
 - Improved interest rate: margin to 1.70% from 2.25%
 - Margin grid linked to sustainability criteria. 3 out of 4 criteria were met in 2021

WILLEMSPOORT NORTH - RESIDENTIAL

Amounts in € millions	2021 FY	2020 FY **
Reported Net debt	-90,7	-37,2
<i>Adjustments:</i>

Balance sheet total for solvency ratio (F)	991,4	930,6
Leverage ratio (A/C) <3*	-1,3	-1,0
Interest cover ratio (B/D) >5*	33,3	63,6
Solvency ratio (E/F) > 21%	30,1%	28,8%

* A negative outcome in combination with a positive rolling EBITDA is permitted

** In 2020 the financial covenants were calculated by a different method. The numbers reported above are presented on a comparable basis and are thus different from those reported last year.

Financial covenants

- Covenant calculation revised as per April 2021, no longer any corrections for IFRS 15 and 16
- 2020 figures on a comparable basis, not calculated the same way as previous year
- Covenants easily complied with due to continued increase in rolling EBITDA, net cash position and guaranteed capital

Executive Board

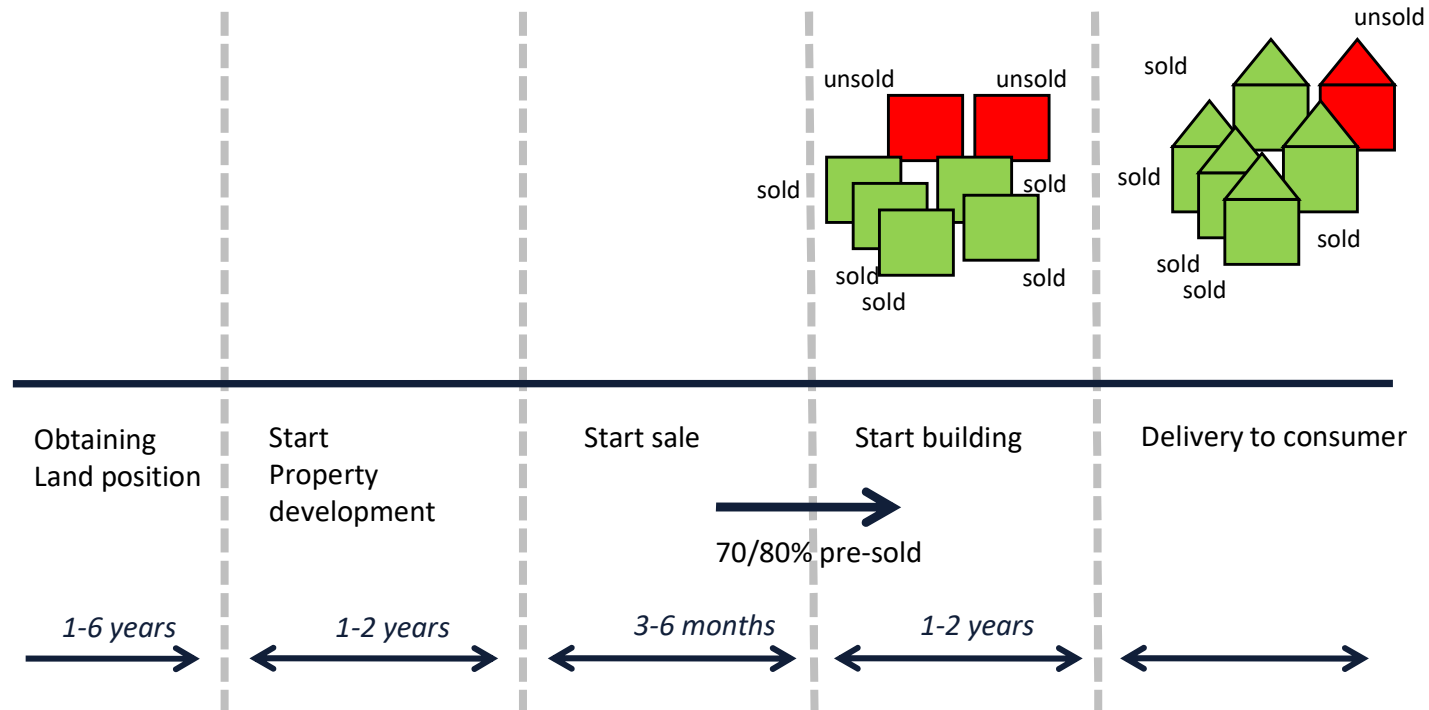

Ton (A.G.J.) Hillen (1961), Member of the Executive Board as of 18 April 2012, Chairman of the Executive Board as of 1 December 2016. responsible for: General Affairs, Infrastructure, Property Development, Building & Technology, Innovation, HR / Management Development, Procurement, Sustainability

Gavin (G.M.P.A.) van Boekel (1975), member of the Executive Board / CFO as of 1 September 2021. He previously held financial positions at Unilever, where most recently he was CFO Middle Europe & BeNeLux. responsible for: Finance, Communications & Investor Relations, ICT, Legal Affairs, Pensions, Facility Management and Risk Management.

Property development process

Process and timing

Revenues recognition is based upon the progress of construction of sold property

Risk management approach

Policies and corporate philosophy gradually developed and implemented as from mid 2008:

- Compact set-up with direct reporting to Executive management;
- Centralised organisation model: to act as ‘One Company’;
- Centralised tender management and procurement, with direct involvement executive management;
- Senior management bonus system based on corporate goals as well as business segment individual kpi’s;
- Periodic review meetings for businesses and (relevant) projects. Both during tenders phase (go / no go) and execution phase to monitor project start up and ‘stick-to-the-plan’ approach;
- ‘Best in class’ project reporting providing good insight on project opportunities as well as risks, issues, cash flow and progress;
- Uniform risk classification for all projects into three categories. Direct involvement from Executive Board in large and complex projects in all phases;
- Culture of openness on project performance. Issues to be escalated asap to enable effective follow-up and support;
- High level of attention for cash management on all levels in the organisation (“Fit for cash” program);
- Implementation of uniform ERP landscape to improve control.
- Balance limitations of project size (over time) versus capacity. Partnering where required;
- Simplified legal structure with limited number of entities and managing directors
- Roll out of Chief Risk Officer within business segments, with an independent role opposed to project teams
- More conservative approach towards profit realization including no profit in first 20% of execution, and harmonization of cost calculation models including rules around opportunities and risks

APPENDIX

Towards one integrated ERP platform (SAP)

Objectives

1. Strengthen Control
2. Integrate Procurement
3. Improve efficiency in back office processes

Key changes

Integrated system / Centralized data management

Data entry at source (orders, hours)

Three way match, digital invoicing AP

1 project structure, also for integrated projects

- Successful deployed to all employees and now implemented in all business segments
- Proven project approach and timelines (Initiated in 2011, Blueprint Q4 2012, start roll-out 2013, implementation completed in 2018);
- Generic processes based upon SAP Best Practices (limited customization, using only industry-standard or industry-customized SAP processes & add-on tools);
- Invested TD: € 13 mln, limited to no impact on running IT costs (phase-out old systems);
- Top-down roll-out with dedicated change management;
- Phasing out of multiple decentralised ERP systems
- 2020: Implementation of SAP In House Cash completed
- 2020 and beyond: to exploit and leverage contribution to “real” business value (enhance performance, more uniform organization, improve operational efficiency and management information, integrating CRM, Vena / Go / No Go decisions).

IFRS % of completion method

- Direct costing applied, i.e. the gross margin is recognized on the basis of the percentage of completion method.
 - In this method, 50% of the gross profit is recognized half way the project, and 100% at completion.
 - Suppose a EUR 100 mln with 10% gross margin and a 2 year construction period.
 - What happens if a setback of EUR 10 mln is discovered?
- At $t = 0$ (for example in the final design stage), 10 mln should be deducted from future profits. The next two years of turnover will not contribute any gross margin
 - At $t = 1$, 50% of the gross profit is already recognized in the previous year. EUR 5 mln should be deducted from future profits (in year 2 no gross margin contribution) and EUR 5 mln should be recorded as loss in the P&L
 - At $t=2$ (just before completion) almost all gross profit has already been recognized as profits in previous year. The setback should be recorded as financial loss in year 2

Shareholder base

The following shareholdings in excess of 3% have been identified:

Shareholdings Heijmans

	31 december 2021	
	Share in capital (%)	Share in voting rights (%)
Kempen Capital Management N.V.	7,0%	1,3%
