Heijmans granted provisional contract award for Amsterdam Court House

Heijmans is part of the New Amsterdam Court House (NACH) consortium that will be implementing the Amsterdam Court House Project. The Central Government Real Estate Agency (Rijksvastgoedbedrijf) has provisionally selected the consortium for this Public Private Partnership (PPP). Following contract award, Heijmans will be given a share in the construction and operation of the court house. The value of the DBFMO project is € 235 million (including a 30-year management and maintenance contract). Final contract award is expected to occur on 10 May 2016.

Design, construct and operate

A special purpose company will be created for the implementation of the project with Macquarie Capital as the sole shareholder. Heijmans, together with Facilicom, will form a combination that will design, construct and operate the court house.

Demolition work for the construction of the new court house along the Zuidas in Amsterdam is expected to commence at the beginning of 2017. The court house is expected to be occupied in November 2020. The 30-year operating period will commence once the building has been occupied.

NACH Consortium

The NACH consortium is a partnership between Macquarie Capital, Heijmans, Facilicom, ABT, DVP, KAAAN Architecten, BiUM and Bouwbedrijf M.J. de Nijs & Zonen. The consortium has appointed Macquarie Capital Europe Limited as Financial Advisor.
