CORONAVIRUS PREVENTIVE ADVISED MEASURES

HYGIENE

Cough and sneeze into the inside of your elbow.

Only use paper tissues once; dispose of them immediately after use.

Wash your hands at least 6x per day in accordance with the hand-washing instructions and in any event prior to eating.

Do not shake hands and touch your face as little as possible.

Facilities must be provided enabling everyone to make use of personal hygiene products, such as soap, sprays and towels.

Do not share your tools with others.

Keep equipment, tools and PPE clean.

Ventilate the office space.

DISTANCE

Keep a 1.5-metre distance from others whenever possible.

Do not have lunch with more than 5 colleagues at a time and keep a distance of at least 2 chair widths.

Do not use the lift with more than 4 persons at a time.

Inform suppliers and other partners to enter into contact by phone whenever possible instead of coming by in person.

FINALLY

Go home if you feel a cold coming on, you are sneezing or you are suffering from respiratory problems. Look after yourself, as well as your colleagues.

Hold each other to account in the event of cold symptoms.

Take especially good care of one another!
